## NEWSLETTER NR 4

**Dear teachers and trainers,**

First of all, we are very happy that you are prepared to evaluate and to try out the modules which are now available in the BioComp project. As you may have heard from the project partner in your country, the project makes good progress, despite the Covid-19 restrictions. From the four learning scenarios, two are ready for testing: Algae and Setting up a BBE company and the other two are in development.

Suppose you were not yet involved in the project from the beginning on, it is a good idea to read the first three newsletters. You can find them on the website [www.biocompetences.eu](http://www.biocompetences.eu).

There you find more general information about the project as well. More specific results can be found on the Navigator: [www.navigator.biocompetences.eu](http://www.navigator.biocompetences.eu).

**Do you want to start now?**

We have placed the individual modules of the learning scenarios "Algae" and "BBE Company" in the navigator. Please go to the corresponding symbol and this is how you can find the individual modules. <https://navigator.biocompetences.eu/>.

Click on the symbol (e.g. Algae) and continue to follow the chapter "learning material". First, we would like to introduce you to the topic; check out the trailer. Below you can then open and read the individual modules.

Good luck with the reading.

In order to find a questionnaire for your evaluation, we give you links for the two scenarios. Click on it and you will find the right online questionnaire.

- Algae: <https://forms.gle/wgbYN7FT47ay7Jpk9>

- BBE company: <https://forms.gle/MXfa5iYXHo6R6Qki9>

Filling in, gives us valuable information. We realize that filling in a questionnaire also has its constraint.

Maybe you have additional experiences, which can be valuable for other colleagues. Do not hesitate to send us this information as well. That can be in the questionnaire in the open questions, but you also can send it separately to us ([elke.halm@gmail.com](mailto:elke.halm@gmail.com), [project@hilda.weges.com](mailto:project@hilda.weges.com) and [hans.blankestijn@casema.nl](mailto:hans.blankestijn@casema.nl))

Pictures and videos are welcome as well!

Thank you in advance for your cooperation.

Your BioComp team
