## NEWSLETTER NR 5

### **Progress in our BioComp project**

#### ***For new readers:***

All previous newsletters can be found on our project website <https://Biocompetences.eu>. The BioComp project is a European Erasmus+ project with partners from Belgium, Bulgaria, Czech Republic, Denmark, Germany, Greece, The Netherlands, and Romania. We hope these Newsletters will give you a good impression of our project.

#### ***For other readers:***

As you know, our project focuses on the development of 4 learning scenarios:

- Production of Algae,
- Biogas,
- Cereals for bio-packaging,
- Setting up a BBE company.

The materials are already prepared and available on our webpages, see below.

### **Our Transnational Partner Meeting in Athens**

After a long period of working together on distance, we were so happy to meet each other in real in Athens. Our partner the University of West Attica had organized our meeting and we were together on 23rd and 24th September.

We presented each other the results which we had realized so far. All materials for the four scenarios are ready and uploaded in the Navigator (<https://navigator.biocompetences.eu/>) You can find there all modules and more.

The modules contain learning material on EQF levels 3-4. To support the teacher and trainer, we also work on pedagogical support. One manual contains more general information ("How-questions") and four more specific manuals give pedagogical guidelines per scenario. Also, these materials will be placed on the Navigator soon.

## **LTTA**

This abbreviation stands for Learning Training Teaching Activity. This is a 3 days training for potential users (teachers and trainers). It is planned for 24-26 November in Prague. Are you a teacher or trainer and interested in this activity, please contact the BioComp partner in your country. See below. The number of participants is very limited, but the results will be used to improve the prepared materials.

## **Further planning**

In the coming months, each partner will organize so-called National Multiplier Events. At these events, all project results will be presented and discussed. You will be informed about the place and date by your partner organization as well.

We plan to finish our project in April 2022. Shortly before we will have another Multiplier Event This will be in Brussels, with participants from different countries. Are you interested to participate? As soon as we have more details, we will inform you on our website and in a next Newsletter.

Hans Blankestijn and Elke Halm (Blankcon NL) and Marek Botek (UCT Prague).
